**To:** Papadopoulos, George; info@apcc.org  
**Subject:** Pilgrim Nuclear Power Station

From two more Cape Cod residents and taxpayers:

The belowmentioned concern is only one of many serious ongoing problems regarding Pilgrim. Please do what you can about this environmental issue. The plant should be closed entirely as it poses a severe danger to human inhabitants, as well as marine and other organisms

*I fully support the comments submitted by the Association to Preserve Cape Cod (APCC) concerning the NPDES draft permit for the Pilgrim Nuclear Power Station. I am very concerned that the draft NPDES permit violates the Clean Water Act.*

Thank you.
